SUMMARY

B.S. in Computer Science seeking full-time job opportunities in software and web development.

COMPUTER SKILLS

Languages

- Java, C, Python
- HTML, CSS, JavaScript

Development

- Unix command-line development
- SQL for database development and management
- Agile methodology for software development

Projects

- **May 2017**

    o Developed a Python-based 'roguelike' game, using the Doryen library (also known as libtcod) and Pygame, as part of a small team.

- **April 2016**

    o Worked closely with a group of three other students to design a significant software project in the form of an online, educational spelling game and accompanying database. This project was developed using Agile software development methods.

- **November 2015**

    o Designed a database and web-based graphic interface intended for tracking student progress at the Granite Connections Learning Lab.

Other Coursework

- Data Structures and Algorithms
- Artificial Intelligence
- Operating Systems
- Computer Networks
- Computer Architecture
